EXPERIENCE

UX Designer/Developer
Computing for All
Sept 2024 - Present
Currently partnering with UX and development team to prototype, design and deliver the UI and UX experience with a lean design process: research, design, test, and iterate. Specifically focusing on the design and development of the Employer onboarding experience on CFA's Talent Portal.

Program Instructor
Computing for All
Jan 2023 - Present
Facilitated student training sessions on Git, HTML, CSS, JavaScript, Development Life Cycle, UX design principles, Figma, wireframing, prototyping, brainstorming techniques, mind mapping, affinity mapping, user journey creation, value proposition development, and agile methodologies, including SCRUM.

Web Experience Designer/Developer
The Seattle Public Library
Jul 2021 - Jan 2022
Redesigned and developed library online services. Collaborated with product and development teams on digital products to improve patron experience.

System Administrator & Web Developer
University of Washington
Oct 2013 - Oct 2015
Successfully resolved help tickets, provided technical solutions, created instructional guides, and implemented bug fixes for students and faculty, while also evaluating Google Analytics, conducting user research, defining metrics, planning, prototyping, presenting to non-technical teams, deploying applications, assessing results, and iteratively refining code to achieve objectives.
